SOFTWARE SOLUTION

Exavibes Software Solutions has developed a number of products and MIS applications for its clients in this service. Our mature software development processes, combined with excellent infrastructure have significantly increased the “on-time and on-budget” delivery of software in the offshore mode. We use a highly effective IMPACT Methodology for offshore and distributed software development.

Our services begin from analysis, moving through designing, development, testing and implementation to maintenance. Our applications come in all sizes, be it a one-table database, or a massive client-server application.

We offer:

1. Application Development

- **Interactive Application Development**
- **Custom Application Development/ Maintenance**
- **MIS and ERP Solutions & Support**

2. Re-engineering

1. APPLICATION DEVELOPMENT

- **Interactive Application Development**

Interactive Application Development (iAD) is about harmonizing art with technology. This business division of Exavibes Software Solution complements the client's requirement of online and desktop applications - be it a work-group solution or mailing platform. It adds a further arc to the circle of 'Net Totality'.

A strong team of software professionals empowers the application development capability at iAD, Exavibes Software Solutions. The applications developed range from Web-stores, online service retailing to enterprise information systems. Our competencies in PHP, Nojde.js, .Net technologies, ASP, XML, and C/ C++ are demonstrated in various network-based applications. SQL/ Oracle database engines support most of these applications.

- **Custom Application Development/ Maintenance**

It is a well-known fact that some of the ready-made, packaged applications have failed to meet the requirements of the customers because of their unique needs and differing business practices and processes. In addition, prohibitive cost of implementing a packaged application and the maintenance thereafter becomes an unwelcome perspective.

We have experienced I.T. Consultants for Project analysis, formulation and concept planning, right up to project management and installation. We develop customized Software that is completely based on user's requirement with GUI (graphical user- friendly interface) on any of the mentioned platform / languages.

- **MIS and ERP Solutions & Support**

We offer customized low cost solutions to industries based on open standards, contemporary technologies and maintenance support. While incorporating the best of business practices, we do take special care of the customer requirements.

ERP Solutions include the development of software in a distributed model, with some phases of the project being conducted onsite and others being conducted offshore. Each phase is uniquely defined and executed. After unit, and system testing the product is then sent to the client for acceptance testing. We have satisfied customers find the solutions user-friendly, flexible, and comprehensive.

2. RE-ENGINEERING

Reengineering Business Reengineering is on the agenda of many companies in different industries. Striving to improve business processes to better meet customer requirements, Business Reengineering initiatives aim at revolutionizing key performance criteria, such as cost, delivery, and quality. As this is a top management issue we ensure that the structure, the work-place contents, the information technology in use and the culture of the organization will successfully assimilate the improved processes.

To tackle with hard and soft barriers and make the reengineering process a success we make sure that following steps are taken in each project:

- **Diagnosing resistance to change**
- **Coaching tools and techniques for helping employees navigate the change process**
- **Implement work teams and case managers extensively throughout the organization.**
- **We believe creative thinking cannot be replaced with software tools and stay away from over sophistication**
- **Build learning, renewal, and short feedback loops into business processes.**

WEB DESIGNING & DEVELOPMENT

Exavibes provides web solutions & services to help customer reach to a wider customer base. The web is a new and different medium for communication and requires a different viewpoint and skill set to use it in the most effective way. You need web consulting to get more return on your investment in your web site.

We can help you get the most effective solution through:

- Website Designing (UI/UX)
- Website Development
- Web Promotion
- Search Engine Optimization
- Web hosting
- E-commerce

1. WEBSITE DESIGNING (UI/UX)

When it comes to your website, off-the-peg is off-limits! Your business is unique and we believe your website should be too! We create websites that work! From design-led static websites to full CMS, we have all the skills to make your site look good and deliver. Our design team works hard to make killer user interfaces and application interfaces for your website. We also offer SEO (Search Engine Optimization), so we can advise you on on-going strategies to make sure your site attracts and maintains plenty of interested web traffic.

2. WEBSITE DEVELOPMENT

Websites can enhance awareness of your brand, leading to more sales. Build relationships with customers, vendors, and shareholders through your online identity get more traffic from the search engines, fast loading web pages with excellent navigation and designing, communicate more effectively. Either you are looking for Dynamic site or a static site is your solution we can help you acquire both. We offer web sites on wide range to technology and frameworks which are tailor made to target your customers and make your presence live on web.

3. WEB PROMOTION

We can promote your site to acquire more traffic, more enquiries, more leads, and more value. Web Promotion is a three phase process and we are your companion to see you through all the phases and that too very well. We get your site listed at the most popular Internet directories because they can send you substantial amounts of traffic and affect you're ranking in various search engines. Email marketing is a great way to promote your electronic Shop to buyers including those who are interested in your shop but have not purchased items from you in the past.

4. SEARCH ENGINE OPTIMIZATION

Your website doesn't mean anything to anyone unless it can be found by your customers. Phase two in Web Promotion is optimizing your site so it appears high in the search engines and uses them to bring even more people to your pages. Our Web development and Promotion methodology, caters to the best of breed processes which helps in a successful on-time and above expected delivery. Phase three ensures that your site attracts even more traffic for which our experts go over techniques like reciprocal links, email signatures, newsletter articles and more.

5. WEB HOSTING

We provide service to host your own website, and users with online systems for storing information, images, video, or other content accessible via the World Wide Web. We also offer custom web hosting as per your requirements. File Hosting Service: Host your static content, typically large files that are not web pages.

6. E-COMMERCE

We offer e-commerce services in custom-built solutions as well as packaged software customizations and implementations. This helps customers to have their business from point of sale implementation and go global. Our competent management team, good post-sales services, well-organized business structure, network infrastructure and a secured, well-designed website will ensure ripe results on your investment. We can customize ecommerce frameworks like Magento, Opencart, WooCommerce, and PrestaShop.

MOBILE APPLICATION DEVELOPMENT

We offer a full cycle of application design, integration and management services. Whether it is a consumer oriented app or a transformative enterprise-class solution, the company leads the entire mobile app development process from ideation and concept to delivery, and to ongoing support.

Having done more than 200 design solutions, we lend our services for: - Logos, Brochures, Advertisements, Corporate Profile Presentation, Product Catalogue, Training/ Tutorials Presentation, 2D-3D Animation and Walkthrough.

QUALITY ASSURANCE & TESTING

All the software solutions developed undergo following cycle of testing:

REQUIREMENTS ANALYSIS

Testing begins in the requirements phase of the software development life cycle.

DESIGN ANALYSIS

During the design phase, testers work with developers in determining what aspects of a design are testable and under what parameter those tests work.

TEST PLANNING

Test Strategy, Test Plan(s), and Test Bed creation.

TEST DEVELOPMENT

Test Procedures, Test Scenarios, and Test Cases & Test Scripts to use in testing software.

TEST EXECUTION

Testers execute the software based on the plans and tests and report any errors found to the development team.

TEST REPORTING

Once testing is completed, testers generate metrics and make final reports on their test effort and whether or not the software tested is ready for release.

RETESTING THE DEFECTS

In this cycle applications are passed through following levels of testing:

- **Component testing tests the minimal software item that can be tested.**
- **Component integration testing exposes defects in the interfaces and interaction between integrated components.**
- **System testing tests an integrated system to verify that it meets its requirements.**
- **Acceptance testing allows the end-user or customer to decide whether or not to accept the product.**
- **After modifying software, either for a change in functionality or to fix defects, a regression test re-runs previously passed tests on the modified software to ensure that the modifications haven't unintentionally caused a regression of previous functionality.**

WHY CHOOSE US

We have exceptionally gifted specialists with phenomenal specialized information and involvement with utilizing the most recent programming principles. We have constructed a huge pool of information that we apply to convey arrangements that address customer's issues, assumptions and spending plan. By putting our customers at the core of all that we do, we are glad that we are as yet supporting our absolute first business customer.
